We specialize in the supply of approved fill material for brownfields

Thalle Industries is an environmentally responsible producer and leading supplier of high quality virgin and recycled aggregate, brownfield fill and asphalt products for the construction industry.

We specialize in the supply of approved fill material for brownfields. Our fill materials are laboratory tested and documented.

The Thalle Industries Recycling Facility in Elmsford, NY, conveniently located near the intersection of I-87 and I-287, takes in rock, concrete and asphalt from construction projects. We accept only clean, uncontaminated concrete, asphalt pavement and rock that has not been in contact with a spill from a petroleum product, hazardous waste or industrial waste and that is not commingled with any other solid waste.

The Elmsford Recycling Facility has been in operation since 1997. Our products have passed the most rigorous environmental tests and have been used as Clean Fill for environmental remediation projects. The material meets 6 NYCRR Part 375 Environmental Remediation Programs (Part 375-6.3 is the specific citation for unrestricted use soil cleanup objectives).

In addition to approved fill materials, we supply high quality aggregate and asphalt products from our quarry and asphalt plant in Fishkill, NY.

Thalle Industries individualized, expert service saves time and reduces costs. We supply the materials you want, in the quantities you want, when you want them. Call us for state, municipal, utility, commercial and private construction projects in the NY Metro area and the Hudson Valley.

Thalle Industries is a leading supplier of high quality aggregate and asphalt

Recent Brownfield Projects

Barretto Point Park, Bronx NY

Located on the beautiful East River waterfront, fishers can sit on its piers and cast a line and boaters take out canoes and kayaks. Also the park, with its beautiful background of sky, grass, and water, makes a perfect place to spend the day.

Irvington Waterfront Park, Irvington, NY

The Village of Irvington, NY has created a waterfront park on a former industrial site. The park was the first project completed under New York State's Brownfield Program. The five-hectare park includes baseball fields, a soccer field, tree-lined walks, open areas for passive recreation, and small boat access to the Hudson River.

One Harbor Square, Ossining, NY

A new, landmark residential community along the Hudson River. Harbor Square will be the first riverfront condominium community to be built along the Ossining waterfront. Residents will enjoy the on-site restaurant, retail shops and exciting waterfront park.

Con Edison MGP Site, Pelham Manor, NY

Con Edison and Levin Properties, LLC, together with the New York State Department of Environmental Conservation (NYSDEC) and the New York State Department of Health (NYSDOH), have completed remediation of a historical manufactured gas plant (MGP).

Downtown Waterfront Redevelopment, Yonkers, NY

The Master Plan for the downtown Yonkers waterfront extends the city to a new mixed-use community on the Hudson River. The 16-acre waterfront site includes Main Street Place featuring a wide avenue with housing over street level retail shops leading to a waterfront plaza, restaurant and the landmarked Yonkers pier.
